#### 1.0 EXECUTIVE SUMMARY

#### 1.1 General Information

**Project Information:** 

Former Coal Yard

**Consultant Information:** 

ATC Associates Inc. 7988 Centerpoint Drive, Suite 100

Indianapolis, Indiana 46256 **Telephone:** 317-849-4990

**Fax:** 317-849-4278

**Reconnaissance Date:** November 18, 2011

**Site Assessor:** Natalie Mathews

**Senior Reviewer:** Jason Cheney, CHMM **Environmental Professional:** Jason Cheney,

**CHMM** 

**Site Information:** 

116 North Depot Street Brazil, Indiana 47834

Clay County

**Site Access Contact:** 

Mr. Jim Coffenberry

**Client Information:** 

West Central Indiana Economic Development District

Mr. Jim Coffenberry 1718 Wabash Avenue Terre Haute, IN 47808

#### **Environmental Professional Statement:**

I declare that, to the best of my professional knowledge and belief, I meet the definition of *Environmental Professional* as defined in § 312.10 part of 40 CFR 312. I have the specific qualifications based on education, training and experience to assess a Property of the nature, history and setting of the subject Property. I have developed and performed the all appropriate inquiries in general accordance with the standards and practices set forth in 40 CFR Part 312.

Natalie Mathews - Geologist

Matalie Mathews

Site Assessor

Jason Cheney, CHMM - Due Diligence Manager Senior Reviewer / Environmental Professional

# 1.2 Findings and Conclusions Summary

ATC Associates Inc. (ATC) has performed this Phase I Environmental Site Assessment (ESA) in general accordance with the scope and limitations of ASTM Standard Practice E 1527-05. Any exceptions to, or deletions from, this practice are described in Section 2.0 of this report. This assessment has revealed no evidence of *recognized environmental conditions* in connection with the Property, except for the following:

	TABLE 1 – FINDINGS AND CONCLUSIONS SUMMARY					
	Report Section	De Minimis Condition	Recognized Environmental Condition (REC)	Historical REC	ASTM Non- Scope Condition	Description
4.0	User Provided Information

7.0	Interviews		X			See Note 4.

Note 1: The Clay Community School Corporation Transportation Department is located to the east of the Property at 212 North Colfax Street. The site is listed with four permanently out of service USTs (two diesel, one gasoline, and one used oil). The installation date for the used oil UST is listed as January 1, 1970. No installation date is noted for the other USTs. One LUST incident is on file for the site. Soil is listed as affected. A No Further Action status was granted for the LUST incident. The site is listed with two currently in use USTs (one diesel and one gasoline) and one unregulated UST (contents not listed). The installation date for the diesel UST is listed as January 1, 1989, the installation date for the gasoline UST is listed as March 1, 1990, and the installation date for the unregulated UST is listed as January 1, 1971. Based on current regulatory status, the LUST incident represents a *historic recognized environmental condition*. However, the presence of currently in use USTs adjacent to the Property

represents a *recognized environmental condition*. However, releases, if any from the USTs would be the responsibility of the Clay Community School Corporation.

Note 2: The review of fire insurance maps identified a former foundry, Central Iron and Steel Company, on the Property. The presence of a former foundry on the Property represents a *recognized environmental condition* associated with the Property.

The review of city directories identified the Property as a former coal storage yard. The presence of a coal storage yard on the Property represents a *recognized environmental condition* at the Property.

Note 3: There are currently no ASTs on the Property. However, according to Mr. Sam Emmert, there used to be two 250-gallon gasoline ASTs on the Property. Mr. Emmert said the ASTs were on stilts and he is not aware of any secondary containments or barriers. He believes the ASTs were used to fuel delivery trucks used by the coal yard years ago. The two ASTs were removed from the Property in August of 2011. The former presence of two gasoline ASTs on the Property represents a *recognized environmental condition*.

Note 4: ATC interviewed Mr. Jim Coffenberry and Mr. Sam Emmert regarding the history of the Property. According to Mr. Coffenberry and Mr. Emmert, the historical use of the Property was as a coal storage yard. They also said there is an issue with coal runoff onto an adjacent property in the southwest corner of the Property. They said coal runoff was going into a ravine on an adjacent property used by Duke Energy. Mr. Emmert said he had put up a plastic barrier to help contain the runnoff, but the barrier was unsuccessful in preventing runoff to the adjacent property. The historical use of the Property as a coal storage yard as well as the issue of coal runoff to an adjacent property represent *recognized environmental conditions*.

# 1.3 Significant Data Gap Summary

The following is a summary of *significant data gaps* identified in this report.

	TABLE 2 – SIGNIFICANT DATA GAP SUMMARY				
	Report Section	Description			
3.5	<b>Current Uses of Adjoining Properties</b>	No significant data gap identified.			
4.2	Environmental Liens or Activity and	No significant data gap identified.			
	Use Limitations (AULs)				
5.1	Standard Environmental Records	No significant data gap identified.			
5.2	<b>Physical Setting Sources</b>	No significant data gap identified.			
5.3	<b>Historical Records Sources</b>	No significant data gap identified.			
6.1	Methodology and Limiting Conditions	No significant data gap identified.			
7.0	Interviews	No significant data gap identified.			

#### 1.4 Conclusions

Based on information collected from the Phase I ESA, further investigation appears warranted.

#### 2.0 INTRODUCTION

# 2.1 Purpose

The purpose of this Phase I ESA was to identify *recognized environmental conditions* and certain potential environmental conditions outside the scope of ASTM Standard Practice E 1527-05 in connection with the Property at the time of the site reconnaissance. This report documents the findings, opinions and conclusions of the Phase I ESA. Photographic documentation is provided in Appendix A, and definitions of terminology and acronyms used in this report are provided in Appendix B.

### 2.2 Scope

This Phase I ESA was conducted in general accordance with the ASTM Standard Practice E 1527-05, and the Professional Services Agreement between ATC and West Central Indiana Economic Development District, dated January 22, 2010 and amended March 19, 2010, consistent with a level of care and skill ordinarily practiced by the environmental consulting profession currently providing similar services under similar circumstances. Significant additions, deletions or exceptions to ASTM Standard Practice E 1527-05 are noted below or in the corresponding sections of this report. The scope of this assessment included an evaluation of the following:

- Physical setting characteristics of the Property through a review of referenced sources such as topographic maps and geologic, soils and hydrologic reports.
- Usage of the Property, adjoining properties and surrounding area through a review of referenced historical sources such as land title records, fire insurance maps, city directories, aerial photographs, prior reports and interviews.
- Observations and interviews regarding current Property usage and conditions including: the use, treatment, storage, disposal or generation of hazardous substances, petroleum products, hazardous wastes, nonhazardous solid wastes and wastewater.
- Usage of adjoining and surrounding area properties and the likely impact of known or suspected releases of hazardous substances or petroleum products from those properties on the Property.
- Information in referenced environmental agency databases and local environmental records, within the specified approximate minimum search distance from the Property.

# 2.3 Significant Assumption

Any assumptions in this report were not considered as having significant impact on the determination of *recognized environmental conditions* associated with the Property.

#### 2.4 Limitations and Exceptions

ATC has prepared this Phase I ESA report using reasonable efforts to identify *recognized environmental* conditions associated with hazardous substances or petroleum products at the Property. Findings contained within this report are based on information collected from observations made on the day(s) of

the site reconnaissance and from reasonably ascertainable information obtained from certain public agencies and other referenced sources.

The ASTM Standard Practice E 1527-05 recognizes inherent limitations for Phase I ESAs, including, but not limited to:

- *Uncertainty Not Eliminated* A Phase I ESA cannot completely eliminate uncertainty regarding the potential for *recognized environmental conditions* in connection with any Property.
- Not Exhaustive A Phase I ESA is not an exhaustive investigation of the Property and environmental conditions on such Property.
- Past Uses of the Property Phase I requirements only require review of standard historical sources at five year intervals. Therefore, past uses of Property at less than five year intervals may not be discovered.

Users of this report may refer to ASTM Standard Practice E 1527-05 for further information regarding these and other limitations. This report is not definitive and should not be assumed to be a complete and/or specific definition of all conditions above or below grade. Current subsurface conditions may differ from the conditions determined by surface observations, interviews and reviews of historical sources. The most reliable method of evaluating subsurface conditions is through intrusive techniques, which are beyond the scope of this report. Information in this report is not intended to be used as a construction document and should not be used for demolition, renovation, or other Property construction purposes. Any use of this report by any party, beyond the scope and intent of the original parties, shall be at the sole risk and expense of such user.

ATC makes no representation or warranty that the past or current operations at the Property are, or have been, in compliance with all applicable federal, state and local laws, regulations and codes. This report does not warrant against future operations or conditions, nor does it warrant against operations or conditions present of a type or at a location not investigated. Regardless of the findings stated in this report, ATC is not responsible for consequences or conditions arising from facts not fully disclosed to ATC during the assessment.

An independent data research company provided the government agency database referenced in this report. Information on surrounding area Properties was requested for approximate minimum search distances and is assumed to be correct and complete unless obviously contradicted by ATC's observations or other credible referenced sources reviewed during the assessment. ATC shall not be liable for any such database firm's failure to make relevant files or documents properly available, to properly index files, or otherwise to fail to maintain or produce accurate or complete records.

ATC used reasonable efforts to identify evidence of aboveground and underground storage tanks and ancillary equipment on the Property during the assessment. "Reasonable efforts" were limited to observation of accessible areas, review of referenced public records and interviews. These reasonable efforts may not identify subsurface equipment or evidence hidden from view by things including, but not limited to, snow cover, paving, construction activities, stored materials and landscaping.

Any estimates of costs or quantities in this report are approximations for commercial real estate transaction due diligence purposes and are based on the findings, opinions and conclusions of this assessment, which are limited by the scope of the assessment, schedule demands, cost constraints, accessibility limitations and other factors associated with performing the Phase I ESA. Subsequent determinations of costs or quantities may vary from the estimates in this report. The estimated costs or quantities in this report are not intended to be used for financial disclosure related to the Financial Accounting Standards Board (FASB) Statement No. 143, FASB Interpretation No. 47, Sarbanes/Oxley Act or any United States Securities and Exchange Commission reporting obligations, and may not be used for such purposes in any form without the express written permission of ATC.

ATC is not a professional title insurance or land surveyor firm and makes no guarantee, express or implied, that any land title records acquired or reviewed in this report, or any physical descriptions or depictions of the Property in this report, represent a comprehensive definition or precise delineation of Property ownership or boundaries.

The Environmental Professional Statement in Section 1.1 of this report does not "certify" the findings contained in this report and is not a legal opinion of such Environmental Professional. The Environmental Professional Statement is intended to document ATC's opinion that an individual meeting the qualifications of an Environmental Professional was involved in the performance of the assessment and that the activities performed by, or under the supervision of, the Environmental Professional were performed in conformance with the standards and practices set forth in 40 CFR Part 312 per the methodology in ASTM Standard Practice E 1527-05 and the scope of work for this assessment.

Per ASTM Standard Practice E 1527-05, Section 6, User Responsibilities, the User of this assessment has specific obligations for performing tasks during this assessment that will help identify the possibility of *recognized environmental conditions* in connection with the Property. Failure by the User to fully comply with the requirements may impact their ability to use this report to help qualify for *Landowner Liability Protections* (LLPs) under Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). ATC makes no representations or warranties regarding a User's qualification for protection under any federal, state or local laws, rules or regulations.

In accordance with the ASTM Standard Practice E 1527-05, this report is presumed to be valid for a six-month period. If the report is older than six months, the following information must be updated in order for the report to be valid: (1) regulatory review, (2) site visit, (3) interviews, (4) specialized knowledge and (5) environmental liens search. Reports older than one year may not meet the ASTM Standard Practice 1527-05 and; therefore, the entire report must be updated to reflect current conditions and Property-specific information.

Other limitations and exceptions that are specific to the scope of this report may be found in corresponding sections.

# 2.5 Special Terms and Conditions (User Reliance)

This report is for the use and benefit of, and may be relied upon by, West Central Indiana Economic Development District, Mr. Sam Emmert, Ms. Joyce Emmert, and any of its affiliates, and third parties authorized in writing by West Central Indiana Economic Development District and ATC, including the lender(s) in connection with a secured financing of the Property, and their respective successors and

assigns. Any third party agrees by accepting this report that any use or reliance on this report shall be limited by the exceptions and limitations in this report, and with the acknowledgment that actual site conditions may change with time, and that hidden conditions may exist at the Property that were not discovered within the authorized scope of the assessment. Any use by or distribution of this report to third parties, without the express written consent of ATC, is at the sole risk and expense of such third party.

ATC makes no other representation to any third party except that it has used the degree of care and skill ordinarily exercised by environmental consultants in the preparation of the report and in the assembling of data and information related thereto. No other warranties are made to any third party, either expressed or implied. Unless otherwise agreed upon in writing by ATC and a third party, ATC's liability to any third party authorized to use or rely on this report with respect to any acts or omissions shall be limited to the amount defined in the Terms and Conditions included in the proposal contract agreement referenced in Section 2.2.

#### 3.0 SITE DESCRIPTION

# 3.1 Location and Legal Description

The Property address is 116 North Depot Street, Brazil, Clay County, Indiana. A Site Vicinity Map is provided as Figure 1, and a Site Plan is provided as Figure 2. According to information provided by Clay County's GIS website, the Property is identified as parcel number 11-02-36-400-146.000-002. According to Ms. Stacy Gibbens of the City of Brazil Planning and Zoning Department, the Property is currently zoned as Open Industrial.

#### 3.2 Surrounding Area General Characteristics

The Property is situated in a relatively flat area characterized by commercial and residential land uses. The surrounding area to the west consists of two residential dwellings and a commercial building used by Armour Eckrich Meats. The surrounding area to the north and east consists of land used by the Clay Community School Corporation's transportation department. The surrounding area to the south consists of a Duke Energy electrical station and associated gravel parking area. Obvious environmental concerns regarding the surrounding area were not identified during this investigation.

# 3.3 Current Use of the Property

The Property is currently unoccupied. There are no structures on the Property. There is an asphalt paved area along the eastern Property boundary that, according to Mr. Emmert, was poured in the fall of 2011. A sunken area with concrete debris, formerly the scale house/office building for the coal storage yard, is located to the west of the asphalt. There are shallow depressions on the southern portion of the Property that contained standing water, presumably from recent rainfall events. A pile of tires is located near the eastern Property boundary and wooden debris is located throughout the Property. The majority of the Property is covered in coal debris, but there are also areas of grass, gravel, and asphalt.

#### 3.4 Description of Property Improvements

The following section describes general conditions and features as noted during ATC's inspection of the Property. Specific environmental issues, such as chemical/waste storage and use, polychlorinated biphenyls (PCBs), storage tanks, sumps, wells, etc. are discussed in Section 6.0 of this report.

	TABLE 3 – PROPERTY IMPROVEMENTS
Size of Property (approximate)	2.05 - acres
General Topography of Property	Flat
Adjoining and/or Access/Egress Roads	Access to the Property is from the east via North Depot Street.
Paved or Concrete Areas (including parking)	There is an asphalt paved area along the eastern Property boundary.
Unimproved Areas	None
Landscaped Areas	None

	TABLE 3 – PROPERTY IMPROVEMENTS
Surface Water	Standing water, which appeared to be the result of recent rainfall events, was observed in shallow depressions on the southern portion of the Property.
Potable Water Source	None
Sanitary Sewer Utility	None
Storm Sewer Utility	None
Electrical Utility	None
Natural Gas Utility	None
<b>Current Occupancy Status</b>	Unoccupied
Unoccupied	There are no buildings on the Property.
Buildings/Spaces/Structures	
Cooling System Type	None
<b>Heating System Type</b>	None
<b>Emergency Power</b>	None

# 3.5 Current Uses of Adjoining Properties

Current uses of the adjoining properties were observed to be as follows:

	TABLE 4 – ADJOINING PROPERTY USES						
Direction from Property	Address	Occupant(s) Name	Current Use	Potential Environmental Conditions			
North	Unknown	Clay Community School Corporation	Transportation Department	None			
South	Unknown	Duke Energy	Electrical Station	None			
East	212 North Colfax Street	Clay Community School Corporation	Transportation Department	See Section 5.1.2			
West	195 North Sherman Street	Armour Eckrich Meats	Commercial	None			
West	121 North Sherman Street	Unknown	Residential	None			

Based on the nature of operations, visual observations, and the regulatory review (Section 5.1), except where noted above, the surrounding areas are unlikely to present an environmental concern to the Property.

#### 4.0 USER PROVIDED INFORMATION

ATC provided WCIEDD with a copy of a Client Questionnaire. The following section summarizes information (if any) provided by WCIEDD with regard to the Phase I ESA and questionnaire. Documentation may be found in Appendix C or where referenced in this report.

#### 4.1 Title Records

ATC obtained title records information from Ameristar Information Network. A detailed discussion of the review of records is found in Section 5.3.4 of this report.

### 4.2 Environmental Liens or Activity and Use Limitations (AULs)

WCIEDD requested ATC obtain a chain of title from Ameristar Information Network. No liens were identified during the review of the chain of title. In addition, according to a Client Questionnaire, the user is unaware of environmental cleanup liens associated with the Property.

### 4.3 Specialized Knowledge

According to a Client Questionnaire, WCIEDD is unaware of specialized knowledge regarding recognized environmental conditions associated with the Property.

### 4.4 Significant Valuation Reduction for Environmental Issues

WCIEDD provided no information regarding a significant valuation reduction for environmental issues associated with the Property.

#### 4.5 Owner, Property Manager and Occupant Information

According to WCIEDD, the contact for the Property is Mr. Sam Emmert, owner of the Property. Information gained from an interview with Mr. Emmert is referenced in appropriate sections of this report.

# 4.6 Reason for Performing Phase I ESA

According to Mr. James Coffenberry of WCIEDD, the reason for conducting this ESA is to identify any environmental issues that would limit future development of the Property.

#### 4.7 Other User Provided Documents

WCIEDD provided no other documents as described in the ASTM Standard Practice E 1527-05.

#### 5.0 RECORDS REVIEW

### 5.1 Standard Environmental Records

The regulatory agency database report discussed in this section, provided by Environmental Data Resources, Inc. (EDR) of Milford, Connecticut was reviewed for information regarding reported releases of hazardous substances and petroleum products on or near the Property. ATC also reviewed the "unmappable" (also referred to as "orphan") listings within the database report, cross-referencing available address information and facility names. Unmappable sites are listings that could not be plotted with confidence, but are potentially in the general area of the Property based on the partial street address, city, or zip code. Any unmappable site that was identified by ATC as being within the approximate minimum search distance from the Property based on the site reconnaissance and/or cross-referencing to mapped listings, is included in the discussion within this section. The complete regulatory agency database report may be found in Appendix D.

The following is a summary of the findings of the database review.

TABLE 5 – SUMMARY OF FEDERAL, STATE AND TRIBAL DATABASE FINDINGS						
Regulatory Database	Approx. Minimum Search Distance	Property Listed?	# Sites Listed			
Federal National Priority (NPL)	1 mile	No	0			
Federal Delisted NPL	½ mile	No	0			
Federal Comprehensive Environmental Response, Compensation, and Liability Information System (CERCLIS) list	½ mile	No	0			
Federal CERCLIS No Further Remedial Action Planned (NFRAP)	½ mile	No	0			
Federal Resource Conservation and Recovery Act (RCRA), Corrective Action facilities (CORRACTS)	1 mile	No	5			
Federal RCRIS non- CORRACTS Treatment, Storage, and Disposal Facilities (TSD)	½ mile	No	0			
Federal RCRA Generators	Property & Adjoining	No	0			
Federal Institutional Control/Engineering Control Registry	Property	No	0			
Federal Emergency Response Notification System (ERNS) list	Property	No	0			
State and Tribal NPL	1 mile	No	0			
State and Tribal CERCLIS	½ mile	No	0			
State and Tribal Landfill or Solid Waste Disposal Sites	½ mile	No	0			
State and Tribal Leaking Underground Storage Tanks (LUST)	½ mile	No	12			
State and Tribal Registered Underground Storage Tanks (UST)	Property & Adjoining	No	2			
State and Tribal Institutional Control/Engineering Control Registry	Property	No	0			
State and Tribal Voluntary Cleanup Site	½ mile	No	0			
State and Tribal Brownfield Sites	½ mile	No	2			

Note: Tribal Databases are not available for the State of Indiana due to the fact that the State of Indiana does not have Federal Tribal Lands.

#### **5.1.1** Federal Agency Database Findings

Based on distance, topography, assumed groundwater gradient, current regulatory status, and/or the absence of reported releases, none of the sites listed in the federal agency databases are considered to represent a likely past, present or material threat of release on the Property.

#### 5.1.2 State and Tribal Database Findings

The following listing with a known or significant potential for release and impact on the Property was identified in the federal agency databases searched:

Clay Community Schools—Transportation Department

212 North Colfax Street **Databases**: UST, LUST

**Approximate Distance from the Property**: 248 feet **Assumed Groundwater Gradient**: crossgradient

Regulatory Data Summary: The site is listed with four permanently out of service USTs (two diesel, one gasoline, and one used oil). The installation date for the used oil UST is listed as January 1, 1970. No installation date is noted for the other USTs. One LUST incident is on file for the site. Soil is listed as affected. A No Further Action status was granted for the LUST incident. The site is listed with two currently in use USTs (one diesel and one gasoline) and one unregulated UST (contents not listed). The installation date for the diesel UST is listed as January 1, 1989, the installation date for the gasoline UST is listed as March 1, 1990, and the installation date for the unregulated UST is listed as January 1, 1971.

**Discussion**: Based on current regulatory status, the LUST incident represents a *historic recognized environmental condition*. However, the presence of currently in use USTs adjacent to the Property represents a *recognized environmental condition*. However, releases, if any from the USTs would be the responsibility of the Clay Community School Corporation.

Based on distance, topography, assumed groundwater gradient, current regulatory status, and/or the absence of reported releases, none of the other sites listed in the federal agency databases are considered to represent a likely past, present or material threat of release on the Property.

#### 5.1.3 Local Environmental Records Sources

The following section describes interviews with local regulatory agencies. The Records of Communication are provided in Appendix E.

Local Health Department

ATC contacted the Clay County Health Department regarding records of environmental complaints or concerns associated with the Property. According to Mr. Bill Hale of the Clay County Health Department, there are no complaints or concerns associated with the Property.

#### Fire Department

ATC attempted to contact the Brazil Fire Department regarding environmental complaints or concerns associated with the Property. Pertinent information gained from this interview, if any, will be provided as an addendum to this report.

Department of Planning and Zoning

ATC contacted Ms. Stacy Gibbens of the City of Brazil Planning and Zoning Department regarding the zoning of the Property. Ms Gibbens stated that the Property is zoned as Open Industrial which is appropriate for the current use.

Other Local Environmental Records Sources

No additional local environmental records sources were reviewed.

#### **5.2** Physical Setting Sources

# 5.2.1 Topography

The Property has a relatively flat topography. The Brazil West, Indiana Topographic Quadrangle Map (USGS, dated 1960, photorevised 1986) indicates the ground surface has an elevation of approximately 650 feet above mean sea level (MSL). Regionally, the ground surface slopes to the west in the project area. A copy of the topographic map is provided as Figure 1.

# 5.2.2 Geology

Wisconsinan to Holocen-aged loess deposits form the unconsolidated material below the Property. The unconsolidated material has a thickness of less than 50 feet.

Pennsylvanian-aged shale and sandstone of the Raccoon Creek group form the bedrock below the Property. The surface of the bedrock has an elevation of approximately 600 feet above MSL. Regionally, the bedrock surface dips to the west in the study area.

#### **5.2.3** Soils

The U.S. Department of Agriculture Soil Survey of Clay County classifies the soil at the Property as Iva silt loam and Muren silt loam. The Iva series consists of deep, nearly level, somewhat poorly drained soils on broad flats and nearly level divides between draws on uplands. These soils have a slow permeability and a high available water capacity. The Muren series consists of deep, nearly level, moderately well drained soils on uplands on ridgetops adjacent to draws and on flat-topped knolls. These soils have a moderately slow permeability and a high available water capacity.

#### 5.2.4 Hydrology

Runoff at the Property is controlled by infiltration into the ground surface and overland flow. Waterworks Creek and its tributaries drain the study area. The creek is located approximately 0.80 miles west-southwest of the Property and flows from east to west.

Regional groundwater flow direction is generally influenced by major hydrogeologic features such as a river or lake. Surface and/or bedrock topography may also influence regional groundwater flow direction. The available hydrogeologic information indicates that local groundwater flow is west. Regional groundwater flow is considered to be west-southwest towards Waterworks Creek and its tributaries. Local geologic features may cause local groundwater flow direction to differ from the regional flow direction. Local hydraulic gradient at the Property is interpreted based on a review of the USGS Topographic Quadrangle Map. A complete hydrogeologic investigation would be necessary to determine actual groundwater flow direction. Estimated groundwater levels and/or flow direction(s) may vary due to seasonal fluctuations in precipitation, local usage demands, geology, underground structures, or dewatering operations.

Surface water was observed in shallow depressions on the southern portion of the Property, which appeared to be the result of recent rainfall events. No signs of stressed vegetation, odor, or sheen were observed with respect to the surface water. Features such as storm water retention ponds, lagoons, or other surface water features such as a creek, river, or lake were not observed at the Property.

#### **5.3** Historical Records Sources

The following table summarizes the findings of the research presented below pertaining to historical Property and surrounding area uses.

TABLE 6 – HISTORICAL USE SUMMARY						
Period	iod Identified Historical Uses		Source(s)	Intervals/Comments		
	Property	Surrounding Area				
Prior to 1940	Central Iron and Steel Company	Commercial Residential	Sanborn Maps Aerial Photographs	Earliest Record Identified: 1883 Fire Insurance Map Data failures from 1922 to 1938; usage of the Property changed from a vacant lot to having a storage building.		
1940 to 1960	Coal Storage Yard	Commercial Residential	Sanborn Maps Aerial Photographs Title Records	bunding.		
1961 to 1980	Coal Storage Yard	Commercial Residential	Aerial Photographs Title Records City Directories			
1981 to present	Coal Storage Yard	Commercial Residential	Aerial Photographs Topographic Maps Title Records City Directories Interviews Site Reconnaissance			

# **5.3.1** Aerial Photographs

ATC reviewed available aerial photographs of the Property and surrounding areas provided by Historical Information Gatherers, Inc. Aerial photographs for the years 1939 to 2008 were reviewed. The following are descriptions and interpretations from the aerial photograph review.

	TABLE 7 – AERIAL PHOTOGRAPH SUMMARY				
Year	Scale	Comments			
1939	1" = 500'	<b>Property</b> : A long building appears on the northern portion of the Property. A			
1946		small building appears centrally located along the eastern Property boundary.			
1954		According to Mr. Sam Emmert, both of these structures were associated with			
1956		the coal storage yard that was on the Property. The long building was used to store coal.			
		<b>Surrounding Area</b> : The surrounding area to the south, east, and west			
		appears to be residential and commercial land. Land to the north appears vacant.			
1972	1" = 500'	<b>Property</b> : Another building appears centrally located on the northern portion			
		of the Property. A portion of the long building no longer appears. The rest of			
		the Property appears similar to the 1956 aerial photograph.			
		<b>Surrounding Area</b> : The surrounding area to the south and east appears as			
		commercial land. The rest of the surrounding area appears similar to the 1956			
		aerial photograph.			
1978		<b>Property</b> : The Property appears similar to the 1972 aerial photograph.			
1986		<b>Surrounding Area</b> : Two buildings appear to the north of the Property. The rest of the surrounding area appears similar to the 1972 aerial photograph.			
1998	1" = 500'	<b>Property</b> : A small building appears near the southeast corner of the Property.			
		The rest of the Property appears similar to the 1986 aerial photograph.			
		<b>Surrounding Area</b> : Multiple buses appear parked on the adjacent land to the			
		east of the Property where the Clay Community School Corporation			
		Transportation Department is currently located. The two buildings located			
		north of the Property are no longer visible, and one larger building appears.			
		A building, currently occupied by Armour Eckrich Meats, appears to the west			
		of the Property.			
2003		<b>Property</b> : Wooded area appears in the northwest corner of the Property. The			
2010		rest of the Property appears similar to the 1998 aerial photograph. During			
		ATC's site reconnaissance, no structures were observed on the Property.			
		According to Mr. Sam Emmert, all of the structures were removed in August of 2011.			
		<b>Surrounding Area</b> : The surrounding area appears similar to the 1998 aerial			
		photograph.			

Except for past use of the Property as a coal storage yard, the review of aerial photographs did not identify past uses indicating *recognized environmental conditions* at the Property and/or surrounding area.

#### **5.3.2** Fire Insurance Maps

The following are descriptions and interpretations from the fire insurance map reviews provided by EDR. Documentation is included in Appendix F.

	TABLE 8 – FIRE INSURANCE MAP SUMMARY					
Year	Comments					
1883	Property: The Property is depicted as being part of the Central Iron and Steel Company. A blacksmith and mechanical shop is located near the southeast corner of the Property. Puddling furnaces are located on the southern portion of the Property. A blast furnace casting house, a pump house, two small buildings, and part of a stock house are located on the northern half of the Property. Two railway lines run through the western portion of the Property.  Surrounding Area: Areas to the north, south, and west are depicted as part of Central Iron and Steel Company. Area to east of the Property is not depicted on the map beyond Depot Street.					
1887 1892	Property: An ore grinding engine is depicted to the north of the puddling furnaces. Two additional railway lines run through the eastern portion of the Property. The rest of the Property appears similar to the 1883 map.  Surrounding Area: Area to the east of the Property is depicted as residential land. Three railway lines appear to the west of the Property and one appears to the east. The rest of the surrounding area appears similar to the 1883 map.					
1896	<b>Property</b> : The blacksmith and mechanical shop appears to have an addition, extending the building northward. The rest of the Property appears similar to the 1892 map. <b>Surrounding Area</b> : An additional railway line appears to the east of the Property. The rest of the surrounding area appears similar to the 1892 map.					
1902	Property: The blast furnace casting house and the northern half of the pump house are no longer visible. The name of the company now appears as Republic Iron and Steel Company. The map states that the Republic Iron and Steel Company is not in operation and the buildings are dilapidated. The rest of the Property appears similar to the 1896 map.  Surrounding Area: The surrounding area appears similar to the 1896 map.					
1910	Property: Republic Iron and Steel Company and its buildings no longer appear on the Property. The Property appears vacant.  Surrounding Area: The Former Republic Iron and Steel Company Old Turn Buckle Factory (used for concrete making) is located to the west of the Property. Terre Haute Indianapolis and Eastern Traction Freight Depot and Power House is located to the south of the Property. Residential land is depicted to the north. Area to the east is not depicted on the map beyond North Depot Street.					
1921	<b>Property</b> : The Property appears similar to the 1910 map. <b>Surrounding Area</b> : Surrounding area to the north and west appear as vacant land. Area to the east appears as commercial land, including Nance's Creamery. Land to the south is similar to the 1910 map.					
1946	<b>Property</b> : A long storage building appears on the northern portion of the Property. A small building appears centrally located along the eastern Property boundary. <b>Surrounding Area</b> : The surrounding area appears similar to the 1921 map.					
1954	Property: The storage building appears to have an addition, extending the building to the east. The rest of the Property appears similar to the 1946 map.  Surrounding Area: An apparent residential dwelling appears to the west of the Property. The rest of the surrounding area appears similar to the 1946 map.					

The review of fire insurance maps identified a former foundry, Central Iron and Steel Company, on the Property. The presence of a former foundry on the Property represents a *recognized environmental condition* associated with the Property.

# 5.3.3 Property Tax Files

ATC reviewed available tax files provided by the Clay County Assessor's Office for historical ownership information on the Property. The current owner was listed as the Sam and Joyce Emmert. Sam and Joyce Emmert acquired the Property from Barbara Pollom on July 25, 2005. No other historical ownership information was available for the Property. The review of tax files did not identify past uses indicating *recognized environmental conditions* at the Property and/or surrounding area. Documentation is included in Appendix F.

#### 5.3.4 Recorded Land Title Records

ATC reviewed recorded land title records from at least 1940 to present for the Property through Ameristar Information Network. The current owners are listed as Sam J. and Joyce E. Emmert. The following are descriptions and interpretations from the review of recorded land title records.

TABLE 9 – LAND TITLE RECORDS OWNERSHIP SUMMARY					
Grantor	Grantee	Date	Volume/ Page		
Unknown	Carl F. and Adah Cutshall, his wife	Prior to 4/20/1950	Unknown		
Carl F. and Adah Cutshall, his wife	Rudolph W. Cutshall	4/20/1950	136/142		
Rudolph W. and Ellen Cutshall, his wife	June Crabb, Trustee	12/06/1952	139/291		
June Crabb, unmarried, Trustee	Rudolph W. and Ellen Cutshall, his wife	12/06/1952	139/292		
Ellen Cutshall	Barbara C. Pollom and Ann C. Menefee, as joint tenants with right of ownership, and not as tenants in common	7/15/1975	173/473		
Ann C. Menefee	Barbara C. Pollom	3/08/1978	181/218		
Barbara C. Pollom	Barbara C. and Roy D. Pollom, as joint tenants with rights of survivorship and not as tenants in common	10/11/1983	202/71		
Barbara C. and Roy D. Pollom, as joint tenants with rights of survivorship and not as tenants in common	Barbara C. Pollom	9/15/1998	225/238		
Barbara C. Pollom	Sam J. and Joyce E. Emmert, husband and wife	7/22/2005	69/1499		

The review of recorded land title records did not identify past uses indicating *recognized environmental conditions* associated with the Property.

# 5.3.5 Historical USGS Topographic Quadrangles

ATC reviewed available historical USGS Topographic Quadrangle Maps for information regarding past uses of the Property. The Brazil West, Indiana Topographic Quadrangle Map (USGS, dated 1960, photorevised 1986) depicts the Property and surrounding area as built up land, indicated by pink shading. No buildings are depicted on the Property or surrounding areas. The review of historical topographic maps did not identify past uses indicating *recognized environmental conditions* associated with the Property. A copy of a USGS Topographic Quadrangle Map is provided as Figure 1.

### 5.3.6 City Directories

Research regarding the availability of historical city directories was conducted by HIG. The Property area was not included in the city directories reviewed prior to 1965. The following are descriptions and interpretations from the historical city directory review.

TABLE 10 – CITY DIRECTORY SUMMARY			
Year	Comments		
1965	Property:		
1968	City Coal Yard		
1973	Surrounding Area:		
	North Depot Street		
	No listings in Property area		
	West State Street		
	Residential in Property area		
1978	Property:		
	City Coal Yard		
	Surrounding Area:		
	North Depot Street		
	No listings in Property area		
	West State Street		
	No listings in Property area		
1983	Property:		
1988	City Coal Yard, City Heating Company		
	Surrounding Area:		
	North Depot Street		
	No listings in Property area		
	West State Street		
	Not listed		
1997	Property:		
2002	City Coal Yard		
2006	Surrounding Area:		
	North Depot Street		
	No listings in Property area		
	West State Street		
	Not listed		

The review of city directories identified the Property as a former coal storage yard. The presence of a coal storage yard on the Property represents a *recognized environmental condition* at the Property. Photocopies of pertinent portions of the city directories are provided in Appendix F.

#### 5.3.7 Zoning/Land Use Records

ATC contacted Ms. Stacy Gibbens of the City of Brazil Planning and Zoning Department regarding zoning of the Property. Ms. Gibbens stated the Property is zoned as Open Industrial, which is appropriate for the current use. No historical information was available.

#### 5.3.8 Prior Reports

No prior reports were made available for review.

# 5.3.9 Interviews

ATC interviewed Mr. Jim Coffenberry regarding the history of the Property. According to Mr. Coffenberry, the historical use of the Property was as a coal storage yard. Mr. Coffenberry also mentioned there used to be buildings on the Property, but they were removed in August of 2011. Mr. Coffenberry said there is an old rail bed that runs along the western Property boundary, but it is not part of the Property. Mr. Coffenberry also said there is an issue with coal runoff onto an adjacent property in the southwest corner of the Property. He said coal runoff was going into a ravine on an adjacent property used by Duke Energy. He said Mr. Emmert had put up a plastic barrier to help contain the runoff, but the barrier was unsuccessful in preventing runoff to the adjacent property.

ATC also interviewed Mr. Sam Emmert, owner of the Property, regarding history of the Property. According to Mr. Emmert, the only known historical use of the Property was as a coal storage yard. Mr. Emmert and his wife have owned the Property since 2005. Mr. Emmert said that all of the previous owners he is aware of were all in the same family. Mr. Emmert was aware of two aboveground storage tanks (ASTs) containing gasoline that used to be on the Property but was not aware of any underground storage tanks (USTs) or past material spills associated with the Property. Mr. Emmert also commented on the former buildings at the Property. He said there were two shacks on the Property along with a long, steel building used to store coal. He said there was also a scale house/office building along the eastern Property boundary and a weigh station. According to Mr. Emmert, the scale house/office was the only building on the Property that was connected to any utilities. It was connected to municipal water and sewer. Mr. Emmert was also in agreement about coal runoff into the ravine in the southwest corner of the Property. He said he had put up a plastic barrier to try and prevent runoff from going on the adjoining property. The Records of Communication are provided in Appendix E.

#### **5.3.10** Other Historical Sources

No other historical sources were reviewed.

#### 6.0 SITE RECONNAISSANCE

The site reconnaissance was conducted by Ms. Natalie Mathews, ATC Field Geologist, on November 18, 2011. ATC was accompanied by Mr. Jim Coffenberry, Economic Development Specialist, and Mr. Sam Emmert, owner of the Property. The following is a summary of visual and/or physical observations of the Property on the day of the site visit. Photographic documentation can be found in Appendix A.

#### 6.1 Methodology and Limiting Conditions

The site reconnaissance consisted of visual and/or physical observations of: the Property and improvements; adjoining sites as viewed from the Property; and, the surrounding area based on visual observations made during the trip to and from the Property. Unimproved portions of the Property (if any) were observed along the perimeter and in a general grid pattern in safely accessible areas. Building exteriors (if any) were observed along the perimeter from the ground, unless described otherwise. Building interiors (if any) were observed as they were made safely accessible, unless described otherwise.

During the site reconnaissance, the weather was overcast and approximately 45 degrees Fahrenheit and windy with adequate visibility. Recently poured asphalt, ground cover, and miscellaneous debris limited observations at the Property.

#### 6.2 Hazardous Substance Use, and Storage

ATC did not observe the use, or storage of hazardous substances on the Property.

#### 6.3 Underground Storage Tanks (USTs)

The information obtained during the visual inspection and discussion with Mr. Sam Emmert did not indicate the presence of a UST. The visual project site inspection included a search for physical features commonly associated with the presence of one or more USTs. These features include: fill ports, vent pipes, slumped pavement or ground surface, patched pavement, evidence of underground piping and a pump station. Although none of these features were discovered at the Property by ATC, the absence of physical features cannot completely rule out the existence of one or more USTs. Property characteristics such as overgrown vegetation or renovation may prevent the identification of a UST.

#### 6.4 Aboveground Storage Tanks (ASTs)

Aboveground storage tanks (ASTs) are considered possible sources of surface and subsurface contamination. These concerns are due to surface spills and other releases which may result from improper usage and filling procedures. There are currently no ASTs on the Property. However, according to Mr. Sam Emmert, there used to be two 250-gallon gasoline ASTs on the Property. Mr. Emmert said the ASTs were on stilts and he is not aware of any secondary containments or barriers. He believes the ASTs were used to fuel delivery trucks used by the coal yard years ago. The two ASTs were removed from the Property in August of 2011. The former presence of two gasoline ASTs on the Property represents a recognized environmental condition.

#### PHASE I ENVIRONMENTAL SITE ASSESSMENT Former Coal Yard

116 North Depot Street Brazil, Indiana

#### **6.5** Other Petroleum Products

ATC did not observe the use, storage or disposal of other petroleum products on the Property.

# **6.6** Polychlorinated Biphenyls (PCBs)

ATC did not observe evidence of the use, storage or disposal of PCB-containing transformers, hydraulic lifts, or other equipment on the Property.

#### 6.7 Unidentified Substance Containers

ATC did not observe the presence of unidentified substance containers on the Property.

### 6.8 Waste Generation, Storage and Disposal

ATC did not observe evidence of the generation or disposal of wastes (hazardous or non-hazardous) on the Property. However, there was a pile of tires as well as random wooden debris throughout the Property.

#### 6.9 Wastewater

ATC did not observe evidence of wastewater generated, treated or discharged (including sanitary sewage) on the Property or to adjoining properties.

#### 6.10 Waste Pits, Ponds and Lagoons

ATC did not observe evidence of waste pits, ponds or lagoons on the Property.

#### **6.11 Sumps**

ATC did not observe evidence of sumps on the Property.

#### 6.12 Septic Systems

ATC did not observe evidence of a septic system on the Property.

# 6.13 Storm Water Management System

Storm water at the Property is expected to infiltrate into the ground surface or flow overland to adjacent roadways.

#### **6.14** Wells

ATC did not observe evidence of wells on the Property.

# 7.0 INTERVIEWS

The following persons were interviewed to obtain information regarding *recognized environmental conditions* in connection with the Property:

TABLE 11 – INTERVIEW SUMMARY						
Role	Name	Title/Company	Years Assoc. With Property	Interview Type		
Client Contact	Mr. Jim Coffenberry	Economic Development Specialist / West Central Indiana Economic Development District	<1	In person Email		
Site Contact	Mr. Sam Emmert	Owner of Property	6	In person Telephone		
Local Government Official	Mr. Bill Hale	Representative / Clay County Health Department	N/A	Email		
Local Government Official	Ms. Stacy Gibbens	Representative / City of Brazil Planning and Zoning Department	N/A	Email		

Pertinent information from the interviews is discussed in applicable sections of this report with details (including failed attempts to interview) documented on Record of Communication forms in Appendix E.

# APPENDIX B

TERMINOLOGY AND ACRONYMS

#### **TERMINOLOGY**

The following provides definitions and descriptions of certain terms that may be used in this report. Italics indicate terms that are defined by ASTM Standard Practice E 1527-05. The Standard Practice should be referenced for further detail (such as the precise wording), related definitions or additional explanation regarding the meaning of terms.

recognized environmental condition(s) (REC) - the presence or likely presence of any hazardous substances or petroleum products on a Property under conditions that indicate an existing release, a past release, or a material threat of a release of any hazardous substances or petroleum products into structures on the Property or into the ground, ground water, or surface water of the Property. The term includes hazardous substances or petroleum products even under conditions in compliance with laws. The term is not intended to include de minimis conditions.

de minimis conditions – are conditions that generally do not present a threat to human health or the environment and that generally would not be the subject of an enforcement action if brought to the attention of appropriate governmental agencies. Conditions determined to be de minimis are not recognized environmental conditions.

historical recognized environmental condition(s) (HREC) - environmental condition which in the past would have been considered a recognized environmental condition, but which may or may not be considered a recognized environmental condition currently. The final decision rests with the environmental professional and will be influenced by the current impact of the historical recognized environmental condition on the Property. If a past release of any hazardous substances or petroleum products has occurred in connection with the Property and has been remediated, with such remediation accepted by the responsible regulatory agency (for example, as evidenced by the issuance of a no further action letter or equivalent), this condition shall be considered a historical recognized environmental condition.

material threat – a physically observable or *obvious* threat which is reasonably likely to lead to a release that, in the opinion of the *environmental professional*, is threatening and might result in impact to public health or the environment. An example might include an aboveground storage tank system that contains a *hazardous substance* and which shows evidence of damage such that it may cause or contribute to tank integrity failure with a release of contents to the environment.

threat to human health or the environment – a substantial risk of harm to public health or the environment resulting from the presence or likely presence of an existing release, a past release, or a *material threat* of a release of any *hazardous substances* or *petroleum products* into structures on the *Property* or into the ground, ground water, or surface water of the *Property*. An example might include a release of a *hazardous substance* in concentrations exceeding applicable governmental agency standards under conditions that could reasonably and foreseeably result in substantial exposure to humans or substantial damage to natural resources. The risk of that exposure or damage would represent a threat to human health or the environment.

generally would not be the subject of an enforcement action – the likelihood that an environmental condition would not be subject to enforcement action if brought to the attention of appropriate governmental agencies. If the circumstances suggest an enforcement action would be less likely than not, then the condition is considered to be generally not the likely the subject of an enforcement action.

#### **ACRONYMS**

The following is a description of acronyms commonly found in Phase I Environmental Assessment Reports.

**ACM** – Asbestos containing materials; asbestos is a natural mineral fiber found in a variety of building materials.

**AST** – Aboveground storage tank; used to store hazardous substance or petroleum products that typically has a capacity greater than 55-gallons.

**ASTM** – American Society for Testing and Engineering

**ATC** – ATC Group Services Inc. d/b/a ATC Associates, Inc.

CERCLA - Comprehensive Environmental Response, Compensation, and Liability Act of 1980

**CERCLIS** – CERCLA Information System; the CERCLIS List is a compilation of known and suspected uncontrolled or abandoned hazardous waste sites which are, or were, under investigation by USEPA but have not been elevated to the status of a Superfund (NPL) site.

**CERCLIS NFRAP** – CERCLIS (see above) No Further Remedial Action Planned; facilities that have been archived from the CERCLIS list where further remedial action is not planned.

**CORRACTS** – Resource Conservation and Recovery Act (RCRA) database of Corrective Action facilities; the RCRIS CORRACTS database identifies treatment storage and disposal (TSD) facilities that have conducted, or are currently conducting, corrective action(s) as regulated under RCRA.

**ERNS** – The Emergency Response Notification System; ERNS is a national database used to collect information on reported releases of oil and hazardous substances.

**ESA** – Phase I Environmental Site Assessment

**HVAC** – Heating, ventilation, and air conditioning

**HREC** – historical recognized environmental condition

**IDEM** – The Indiana Department of Environmental Management

LBP - Lead-based Paint

**LQG** – Large Quantity Generator of hazardous waste under RCRIS (see below).

LUST - Leaking underground storage tank; the IDEM maintains a database of reported LUSTs.

MSDS - Material Safety Data Sheet

#### PHASE I ENVIRONMENTAL SITE ASSESSMENT Former Coal Yard

116 North Depot Street Brazil, Indiana

N/A – Not applicable

**NPL** – National Priority List; the NPL is a subset of the CERCLIS and lists Properties that are ranked as high priority for cleanup under the Superfund program.

**PCBs** – Polychlorinated biphenyl compounds; PCBs are carcinogenic compounds found in, but not limited to: transformers, capacitors, hydraulic equipment (such as elevators or automotive lifts), and fluorescent light ballasts.

**RCRA** – The Resource Conservation and Recovery Act; the RCRA program identifies and tracks hazardous wastes from the point of generation to the point of disposal.

**RCRIS** – RCRA Information System; the RCRIS Generators database tracks large and small quantity generators of hazardous waste.

**REC** – recognized environmental condition

**SCL** – State Cleanup List; the SCL database is a comprehensive listing of facilities that are considered to be a threat to public health and welfare by the IDEM.

**SQG** – Small Quantity Generator of hazardous waste under RCRIS.

**SWF/LF** – The Solid Waste/Landfill Facilities. The SWF/LF database is a comprehensive listing of Indiana permitted/recorded solid waste facilities.

**TSD** – Treatment, Storage or Disposal facility; the RCRIS database tracks those facilities that treat, store and/or dispose of hazardous materials as defined by RCRA.

**U.S. EPA** – United States Environmental Protection Agency

**USGS** – United States Geological Survey

**UST** – Underground storage tank; the IDEM maintains a list of registered USTs.

# APPENDIX C

**USER PROVIDED DOCUMENTATION** 

# ATTACHMENT CLIENT QUESTIONNAIRE

Per ASTM Standard Practice E 1527-05, Section 6, User Responsibilities, the User of an ESA has specific obligations for performing tasks during the ESA that will help identify the possibility of *recognized environmental conditions* in connection with the Site. Failure by the User to fully comply with the requirements may result in a *data gap* being identified in the report and may impact their ability to use the report to help qualify for *Landowner Liability Protections* (LLPs) under Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). If this questionnaire is not returned to ATC prior to issuance of the draft report, then ATC assumes that the User does not have any information or actual knowledge pursuant to ASTM Standard Practice E 1527-05, Section 6, User Responsibilities. ATC makes no representations or warranties regarding a User's qualification for protection under any federal, state or local laws, rules or regulations.

Please complete the following and return immediately via email or fax to the attention of: Jason Cheney

If other parties intend to use the ESA report, then please forward a copy of this questionnaire for them to complete and return to ATC.

Site Name:	Brazil City (DA) YARd	
Site Address:	116 N. Depot St., Britzil, 7	EN
ATC Project Number:		
Please provide the following inf 1527-05.	formation (if available) per the requirements of ASTM E	
1. Environmental cleanup lie 312.25)	ens that are filed or recorded against the site (40 CFR	
Are you aware of any environme under federal, tribal, state or loca If yes, please provide a description		æ
Signature of the state of the s		
3.3		

Are you aware of any AULs, such as engineering controls, land use restrictions or institutional controls that are in place at the site and/or have been filed or recorded in a registry under federal, tribal, state or local law? Yes \int or No \int \int

2. Activity and land use limitations (AULs) that are in place on the site or that have

been filed or recorded in a registry (40 CFR 312.26)

If yes, please provide.

v. 9/2006
3. Specialized knowledge or experience of the person seeking to qualify for the Landowner Liability Protections (40 CFR 312.28)
As the user of this ESA do you have any specialized knowledge or experience related to the site or nearby properties? For example, are you involved in the same line of business as the current or former occupants of the site or an adjoining property so that you would have specialized knowledge of the chemicals and processes used by this type of business? Yes $\square$ or No $\square$ If yes, please explain.
<ul> <li>4. Relationship of the purchase price to the fair market value of the site if it were not contaminated (40 CFR 312.29)</li> <li>a. Does the purchase price being paid for this site reasonably reflect the fair market value of the site? Yes  or No </li> </ul>
- KI/A
b. If you conclude that there is a difference, have you considered whether the lower purchase price is because contamination is known or believed to be present at the site?  Yes or No If yes, please explain.
5. Commonly known or reasonably ascertainable information about the site (40 CFR 312.30)
Are you aware of commonly known or reasonably ascertainable information about the site that would help the environmental professional to identify conditions indicative of releases or threatened releases? For example, as user,
a. Do you know the past uses of the site? Yes or No If yes, please state.

	achment – Client Questionnaire 0/2006
b	Do you know of specific chemicals that are present or once were present at the site?  Yes or No very liftyes, please state.
c.	Do you know of spills or other chemical releases that have taken place at the site?  Yes  or No  If yes, please state.
6.	Do you know of any environmental cleanups that have taken place at the site?  Yes \( \subseteq \text{or No } \( \subseteq \subseteq \text{if yes, please state.} \)
CF As	e site, and the ability to detect the contamination by appropriate investigation (40 TR 312.31)  the user of this ESA, based on your knowledge and experience related to the site are
at t	re any obvious indicators that point to the presence or likely presence of contamination he site?  s vor No lifyes, please explain.  The site has significant amounts of mail Augas.
_	
fol	nile not required in order to determine that "all appropriate inquiry" is complete, the lowing requested information is intended to assist ATC Associates Inc. in the completion this ESA.
•	Please provide the reason for performing this ESA.  To identify any sowing own suffal issues  That would limit Fature deve hopmant  The site.
•	What is the type of property transaction, for example, sale, purchase, exchange, etc?

•	Please identify all parties who will rely on this ESA (please note, a fee of \$500.00 per entity and the completion of a Third Party Reliance Secondary Client Agreement form may be required if more than two entities, other than the paying user, are required).
	WCIEDD
	SAM J. & JOYCE E. EMMERT
•	Please identify the site contact name and contact information.
	SAM Emmert (812) 208-5242
	(\$12) 208-5242
	<b>3.</b> 10 10 10 10 10 10 10 10 10 10 10 10 10
•	Please provide any information regarding the correct address for the Property (including maps or other documentation depicting Property location and boundaries) and any other information (prior reports, waste generation documentation, construction drawings, etc.) that may be helpful in the completion
	of this report.
1 h	is questionnaire was completed by:
	Name JAMES Cotten DERMY

#### **Disclaimer - Copyright and Trademark Notice**

This Report contains certain information obtained from a variety of public and other sources reasonably available to Environmental Data Resources, Inc. It cannot be concluded from this Report that coverage information for the target and surrounding properties does not exist from other sources. NO WARRANTY EXPRESSED OR IMPLIED, IS MADE WHATSOEVER IN CONNECTION WITH THIS REPORT. ENVIRONMENTAL DATA RESOURCES, INC. SPECIFICALLY DISCLAIMS THE MAKING OF ANY SUCH WARRANTIES, INCLUDING WITHOUT LIMITATION, MERCHANTABILITY OR FITNESS FOR A PARTICULAR USE OR PURPOSE. ALL RISK IS ASSUMED BY THE USER. IN NO EVENT SHALL ENVIRONMENTAL DATA RESOURCES, INC. BE LIABLE TO ANYONE, WHETHER ARISING OUT OF ERRORS OR OMISSIONS, NEGLIGENCE, ACCIDENT OR ANY OTHER CAUSE, FOR ANY LOSS OF DAMAGE, INCLUDING, WITHOUT LIMITATION, SPECIAL, INCIDENTAL, CONSEQUENTIAL, OR EXEMPLARY DAMAGES. ANY LIABILITY ON THE PART OF ENVIRONMENTAL DATA RESOURCES, INC. IS STRICTLY LIMITED TO A REFUND OF THE AMOUNT PAID FOR THIS REPORT. Purchaser accepts this Report "AS IS". Any analyses, estimates, ratings, environmental risk levels or risk codes provided in this Report are provided for illustrative purposes only, and are not intended to provide, nor should they be interpreted as providing any facts regarding, or prediction or forecast of, any environmental risk for any property. Only a Phase I Environmental Site Assessment performed by an environmental professional can provide information regarding the environmental risk for any property. Additionally, the information provided in this Report is not to be construed as legal advice.

Copyright 2011 by Environmental Data Resources, Inc. All rights reserved. Reproduction in any media or format, in whole or in part, of any report or map of Environmental Data Resources, Inc., or its affiliates, is prohibited without prior written permission.

EDR and its logos (including Sanborn and Sanborn Map) are trademarks of Environmental Data Resources, Inc. or its affiliates. All other trademarks used herein are the property of their respective owners.

A search of available environmental records was conducted by Environmental Data Resources, Inc (EDR). The report was designed to assist parties seeking to meet the search requirements of EPA's Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), the ASTM Standard Practice for Environmental Site Assessments (E 1527-05) or custom requirements developed for the evaluation of environmental risk associated with a parcel of real estate.

#### TARGET PROPERTY INFORMATION

#### **ADDRESS**

116 NORTH DEPOT STREET BRAZIL, IN 47834

#### **COORDINATES**

Latitude (North): 39.523800 - 39° 31' 25.7" Longitude (West): 87.132300 - 87° 7' 56.3"

Universal Tranverse Mercator: Zone 16 UTM X (Meters): 488628.6 UTM Y (Meters): 4374705.0

Elevation: 665 ft. above sea level

#### USGS TOPOGRAPHIC MAP ASSOCIATED WITH TARGET PROPERTY

Target Property Map: 39087-E2 BRAZIL WEST, IN

#### TARGET PROPERTY SEARCH RESULTS

The target property was not listed in any of the databases searched by EDR.

#### **DATABASES WITH NO MAPPED SITES**

No mapped sites were found in EDR's search of available ("reasonably ascertainable ") government records either on the target property or within the search radius around the target property for the following databases:

#### **SURROUNDING SITES: SEARCH RESULTS**

Surrounding sites were identified in the following databases.

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property.

Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in **bold italics** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

#### STANDARD ENVIRONMENTAL RECORDS

#### Federal RCRA generators list

RCRA-CESQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Conditionally exempt small quantity generators (CESQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

A review of the RCRA-CESQG list, as provided by EDR, and dated 06/15/2011 has revealed that there is 1 RCRA-CESQG site within approximately 0.25 miles of the target property.

Lower Elevation	Address	Direction / Distance	Map ID	Page
ADAMSONS FABRIC CARE	608 NATIONAL HWY	SW 1/8 - 1/4 (0.158 mi.)	C19	31

#### State and tribal leaking storage tank lists

LUST: Lust List.

A review of the LUST list, as provided by EDR, and dated 09/07/2011 has revealed that there are 12

LUST sites within approximately 0.5 miles of the target property.

#### State and tribal registered storage tank lists

UST: The Underground Storage Tank database contains registered USTs. USTs are regulated under Subtitle I of the Resource Conservation and Recovery Act (RCRA). The data come from the Department of Environmental Management's Indiana Registered Underground Storage Tanks list.

A review of the UST list, as provided by EDR, and dated 03/16/2011 has revealed that there are 16 UST sites within approximately 0.25 miles of the target property.

#### State and tribal Brownfields sites

BROWNFIELDS: >A brownfield site is an industrial or commercial property that is abandoned, inactive, or underutilized, on which expansion or redevelopment is complicated due to the actual or perceived environmental contamination.

A review of the BROWNFIELDS list, as provided by EDR, and dated 09/07/2011 has revealed that there are 2 BROWNFIELDS sites within approximately 0.5 miles of the target property.

#### ADDITIONAL ENVIRONMENTAL RECORDS

#### Other Ascertainable Records

RCRA-NonGen: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

A review of the RCRA-NonGen list, as provided by EDR, and dated 06/15/2011 has revealed that there are 4 RCRA-NonGen sites within approximately 0.25 miles of the target property.

#### **EDR PROPRIETARY RECORDS**

#### **EDR Proprietary Records**

Manufactured Gas Plants: The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States

from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

A review of the Manufactured Gas Plants list, as provided by EDR, has revealed that there is 1 Manufactured Gas Plants site within approximately 1 mile of the target property.

Date form received by agency: 08/18/1980

Facility name: CENTRAL TRUCKING INC Classification: Not a generator, verified

# Hazardous Waste Summary:

Waste code: D001

Waste name: IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF

LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT

WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.

Waste code: D002

Waste name: A WASTE WHICH HAS A PH OF LESS THAN 2 OR GREATER THAN 12.5 IS

CONSIDERED TO BE A CORROSIVE HAZARDOUS WASTE. SODIUM HYDROXIDE, A CAUSTIC SOLUTION WITH A HIGH PH, IS OFTEN USED BY INDUSTRIES TO CLEAN OR DEGREASE PARTS. HYDROCHLORIC ACID, A SOLUTION WITH A LOW PH, IS USED BY MANY INDUSTRIES TO CLEAN METAL PARTS PRIOR TO PAINTING. WHEN THESE CAUSTIC OR ACID SOLUTIONS BECOME CONTAMINATED AND MUST BE

DISPOSED, THE WASTE WOULD BE A CORROSIVE HAZARDOUS WASTE.

Waste code: F001

Waste name: THE FOLLOWING SPENT HALOGENATED SOLVENTS USED IN DEGREASING:

TETRACHLOROETHYLENE, TRICHLOROETHYLENE, METHYLENE CHLORIDE, 1,1,1-TRICHLOROETHANE, CARBON TETRACHLORIDE, AND CHLORINATED

FLUOROCARBONS; ALL SPENT SOLVENT MIXTURES/BLENDS USED IN DEGREASING CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE HALOGENATED SOLVENTS OR THOSE SOLVENTS LISTED IN F002, F004, AND F005, AND STILL BOTTOMS FROM THE RECOVERY OF THESE

IN FUUZ, FUU4, AND FUU5, AND STILL BOTTOMS FROM THE F

SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

Environmental Interest/Information System

IN-FRS (Indiana - Facility Registry System). The Indiana Department of Environmental Management (I-DEM) has implemented the Indiana-Facility Registry System (I-FRS). The I-FRS provides the interface and processes to link facility data monitored by multiple State and EPA program systems. In addition, I-FRS enables IDEM to reconcile environmental data and exchange it with EPA FRS using the electronic data exchange over the Network Node.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

**Number of Days to Update:** Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

## STANDARD ENVIRONMENTAL RECORDS

#### Federal NPL site list

NPL: National Priority List

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Proposed NPL: Proposed National Priority List Sites

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

Date of Government Version: 06/30/2011 Source: EPA
Date Data Arrived at EDR: 07/12/2011 Telephone: N/A

Number of Days to Update: 79 Next Scheduled EDR Contact: 01/23/2012
Data Release Frequency: Quarterly

NPL LIENS: Federal Superfund Liens

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

#### Federal Delisted NPL site list

**DELISTED NPL: National Priority List Deletions** 

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

Next Scheduled EDR Contact: 01/23/2012 Data Release Frequency: Quarterly

#### Federal CERCLIS list

CERCLIS: Comprehensive Environmental Response, Compensation, and Liability Information System

CERCLIS contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). CERCLIS contains sites which are either proposed to or on the National Priorities List (NPL) and sites which are in the screening and assessment phase for possible inclusion on the NPL.

#### Federal CERCLIS NFRAP site List

CERCLIS-NFRAP: CERCLIS No Further Remedial Action Planned

Archived sites are sites that have been removed and archived from the inventory of CERCLIS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list this site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. This decision does not necessarily mean that there is no hazard associated with a given site; it only means that, based upon available information, the location is not judged to be a potential NPL site.

#### Federal RCRA non-CORRACTS TSD facilities list

RCRA-TSDF: RCRA - Treatment, Storage and Disposal

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

Date of Government Version: 06/15/2011 Date Data Arrived at EDR: 07/07/2011 Date Made Active in Reports: 08/08/2011

## Federal RCRA generators list

RCRA-LQG: RCRA - Large Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

Date of Government Version: 06/15/2011 Date Data Arrived at EDR: 07/07/2011 Date Made Active in Reports: 08/08/2011 Number of Days to Update: 32

RCRA-SQG: RCRA - Small Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

RCRA-CESQG: RCRA - Conditionally Exempt Small Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Conditionally exempt small quantity generators (CESQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

#### Federal institutional controls / engineering controls registries

US ENG CONTROLS: Engineering Controls Sites List

A listing of sites with engineering controls in place. Engineering controls include various forms of caps, building foundations, liners, and treatment methods to create pathway elimination for regulated substances to enter environmental media or effect human health.

Date of Government Version: 03/16/2011 Date Data Arrived at EDR: 03/25/2011 Date Made Active in Reports: 06/14/2011

Number of Days to Update: 81

Source: Environmental Protection Agency

Telephone: 703-603-0695 Last EDR Contact: 09/12/2011

Next Scheduled EDR Contact: 12/26/2011 Data Release Frequency: Varies

US INST CONTROL: Sites with Institutional Controls

A listing of sites with institutional controls in place. Institutional controls include administrative measures, such as groundwater use restrictions, construction restrictions, property use restrictions, and post remediation care requirements intended to prevent exposure to contaminants remaining on site. Deed restrictions are generally required as part of the institutional controls.

Date of Government Version: 03/16/2011 Date Data Arrived at EDR: 03/25/2011 Date Made Active in Reports: 06/14/2011

# State- and tribal - equivalent CERCLIS

SHWS: List of Hazardous Waste Response Sites Scored Using the Indiana Scoring Model

State Hazardous Waste Sites. State hazardous waste site records are the states' equivalent to CERCLIS. These sites may or may not already be listed on the federal CERCLIS list. Priority sites planned for cleanup using state funds (state equivalent of Superfund) are identified along with sites where cleanup will be paid for by potentially responsible parties. Available information varies by state.

Next Scheduled EDR Contact: 12/19/2011 Data Release Frequency: Semi-Annually

#### ADDITIONAL ENVIRONMENTAL RECORDS

## Local Brownfield lists

US BROWNFIELDS: A Listing of Brownfields Sites

Included in the listing are brownfields properties addresses by Cooperative Agreement Recipients and brownfields properties addressed by Targeted Brownfields Assessments. Targeted Brownfields Assessments-EPA's Targeted Brownfields Assessments (TBA) program is designed to help states, tribes, and municipalities--especially those without EPA Brownfields Assessment Demonstration Pilots--minimize the uncertainties of contamination often associated with brownfields. Under the TBA program, EPA provides funding and/or technical assistance for environmental assessments at brownfields sites throughout the country. Targeted Brownfields Assessments supplement and work with other efforts under EPA's Brownfields Initiative to promote cleanup and redevelopment of brownfields. Cooperative Agreement Recipients-States, political subdivisions, territories, and Indian tribes become Brownfields Cleanup Revolving Loan Fund (BCRLF) cooperative agreement recipients when they enter into BCRLF cooperative agreements with the U.S. EPA selects BCRLF cooperative agreement recipients based on a proposal and application process. BCRLF cooperative agreement recipients must use EPA funds provided through BCRLF cooperative agreement for specified brownfields-related cleanup activities.

DOD: Department of Defense Sites

This data set consists of federally owned or administered lands, administered by the Department of Defense, that have any area equal to or greater than 640 acres of the United States, Puerto Rico, and the U.S. Virgin Islands.

Date of Government Version: 12/31/2005 Date Data Arrived at EDR: 11/10/2006 Date Made Active in Reports: 01/11/2007

Number of Days to Update: 62

Source: USGS

Telephone: 888-275-8747 Last EDR Contact: 10/20/2011

Next Scheduled EDR Contact: 01/30/2012 Data Release Frequency: Semi-Annually

FUDS: Formerly Used Defense Sites

The listing includes locations of Formerly Used Defense Sites properties where the US Army Corps of Engineers is actively working or will take necessary cleanup actions.

Date of Government Version: 12/31/2009 Date Data Arrived at EDR: 08/12/2010 Date Made Active in Reports: 12/02/2010

Number of Days to Update: 112

Source: U.S. Army Corps of Engineers

Telephone: 202-528-4285 Last EDR Contact: 09/12/2011

Next Scheduled EDR Contact: 12/26/2011 Data Release Frequency: Varies

CONSENT: Superfund (CERCLA) Consent Decrees

Major legal settlements that establish responsibility and standards for cleanup at NPL (Superfund) sites. Released periodically by United States District Courts after settlement by parties to litigation matters.

Date of Government Version: 06/01/2011 Date Data Arrived at EDR: 08/19/2011 Date Made Active in Reports: 09/29/2011

Number of Days to Update: 41

Source: Department of Justice, Consent Decree Library Telephone: Varies

Last EDR Contact: 10/03/2011

Next Scheduled EDR Contact: 01/16/2012 Data Release Frequency: Varies

ROD: Records Of Decision

Record of Decision. ROD documents mandate a permanent remedy at an NPL (Superfund) site containing technical and health information to aid in the cleanup.

Date of Government Version: 07/31/2011 Date Data Arrived at EDR: 09/14/2011 Date Made Active in Reports: 09/29/2011

Number of Days to Update: 15

Source: EPA

Telephone: 703-416-0223 Last EDR Contact: 09/14/2011

Next Scheduled EDR Contact: 12/26/2011 Data Release Frequency: Annually

UMTRA: Uranium Mill Tailings Sites

Uranium ore was mined by private companies for federal government use in national defense programs. When the mills shut down, large piles of the sand-like material (mill tailings) remain after uranium has been extracted from the ore. Levels of human exposure to radioactive materials from the piles are low; however, in some cases tailings were used as construction materials before the potential health hazards of the tailings were recognized.

Date of Government Version: 09/14/2010 Date Data Arrived at EDR: 10/21/2010 Date Made Active in Reports: 01/28/2011

#### HIST FTTS: FIFRA/TSCA Tracking System Administrative Case Listing

A complete administrative case listing from the FIFRA/TSCA Tracking System (FTTS) for all ten EPA regions. The information was obtained from the National Compliance Database (NCDB). NCDB supports the implementation of FIFRA (Federal Insecticide, Fungicide, and Rodenticide Act) and TSCA (Toxic Substances Control Act). Some EPA regions are now closing out records. Because of that, and the fact that some EPA regions are not providing EPA Headquarters with updated records, it was decided to create a HIST FTTS database. It included records that may not be included in the newer FTTS database updates. This database is no longer updated.

Date of Government Version: 10/19/2006 Date Data Arrived at EDR: 03/01/2007 Date Made Active in Reports: 04/10/2007

Number of Days to Update: 40

Source: Environmental Protection Agency

Telephone: 202-564-2501 Last EDR Contact: 12/17/2007

Next Scheduled EDR Contact: 03/17/2008 Data Release Frequency: No Update Planned

#### HIST FTTS INSP: FIFRA/TSCA Tracking System Inspection & Enforcement Case Listing

A complete inspection and enforcement case listing from the FIFRA/TSCA Tracking System (FTTS) for all ten EPA regions. The information was obtained from the National Compliance Database (NCDB). NCDB supports the implementation of FIFRA (Federal Insecticide, Fungicide, and Rodenticide Act) and TSCA (Toxic Substances Control Act). Some EPA regions are now closing out records. Because of that, and the fact that some EPA regions are not providing EPA Headquarters with updated records, it was decided to create a HIST FTTS database. It included records that may not be included in the newer FTTS database updates. This database is no longer updated.

Next Scheduled EDR Contact: 03/17/2008 Data Release Frequency: No Update Planned

#### SSTS: Section 7 Tracking Systems

Section 7 of the Federal Insecticide, Fungicide and Rodenticide Act, as amended (92 Stat. 829) requires all registered pesticide-producing establishments to submit a report to the Environmental Protection Agency by March 1st each year. Each establishment must report the types and amounts of pesticides, active ingredients and devices being produced, and those having been produced and sold or distributed in the past year.

Date of Government Version: 12/31/2009 Date Data Arrived at EDR: 12/10/2010 Date Made Active in Reports: 02/25/2011

Number of Days to Update: 77

Telephone: 202-564-4203 Last EDR Contact: 10/31/2011

Next Scheduled EDR Contact: 02/13/2012 Data Release Frequency: Annually

#### ICIS: Integrated Compliance Information System

The Integrated Compliance Information System (ICIS) supports the information needs of the national enforcement and compliance program as well as the unique needs of the National Pollutant Discharge Elimination System (NPDES) program.

Date of Government Version: 01/07/2011 Date Data Arrived at EDR: 01/21/2011 Date Made Active in Reports: 03/21/2011

Number of Days to Update: 59

Source: Environmental Protection Agency

Telephone: 202-564-5088 Last EDR Contact: 09/26/2011

Next Scheduled EDR Contact: 01/09/2012 Data Release Frequency: Quarterly

#### PADS: PCB Activity Database System

PCB Activity Database. PADS Identifies generators, transporters, commercial storers and/or brokers and disposers of PCB's who are required to notify the EPA of such activities.

Date of Government Version: 11/01/2010 Date Data Arrived at EDR: 11/10/2010 Date Made Active in Reports: 02/16/2011

Number of Days to Update: 98

Source: EPA

Telephone: 202-566-0500 Last EDR Contact: 10/19/2011

Next Scheduled EDR Contact: 01/30/2012 Data Release Frequency: Annually

#### MLTS: Material Licensing Tracking System

MLTS is maintained by the Nuclear Regulatory Commission and contains a list of approximately 8,100 sites which possess or use radioactive materials and which are subject to NRC licensing requirements. To maintain currency, EDR contacts the Agency on a quarterly basis.

Date of Government Version: 06/21/2011 Date Data Arrived at EDR: 07/15/2011 Date Made Active in Reports: 09/13/2011

Number of Days to Update: 60

Source: Nuclear Regulatory Commission

Telephone: 301-415-7169 Last EDR Contact: 09/12/2011

Next Scheduled EDR Contact: 12/26/2011 Data Release Frequency: Quarterly

#### RADINFO: Radiation Information Database

The Radiation Information Database (RADINFO) contains information about facilities that are regulated by U.S. Environmental Protection Agency (EPA) regulations for radiation and radioactivity.

Date of Government Version: 01/11/2011 Date Data Arrived at EDR: 01/13/2011 Date Made Active in Reports: 02/16/2011

Number of Days to Update: 34

Source: Environmental Protection Agency

Telephone: 202-343-9775 Last EDR Contact: 10/13/2011

Next Scheduled EDR Contact: 01/23/2012 Data Release Frequency: Quarterly

### FINDS: Facility Index System/Facility Registry System

Facility Index System. FINDS contains both facility information and 'pointers' to other sources that contain more detail. EDR includes the following FINDS databases in this report: PCS (Permit Compliance System), AIRS (Aerometric Information Retrieval System), DOCKET (Enforcement Docket used to manage and track information on civil judicial enforcement cases for all environmental statutes), FURS (Federal Underground Injection Control), C-DOCKET (Criminal Docket System used to track criminal enforcement actions for all environmental statutes), FFIS (Federal Facilities Information System), STATE (State Environmental Laws and Statutes), and PADS (PCB Activity Data System).

Date of Government Version: 04/14/2010 Date Data Arrived at EDR: 04/16/2010 Date Made Active in Reports: 05/27/2010

Number of Days to Update: 41

Source: EPA

Telephone: (312) 353-2000 Last EDR Contact: 09/13/2011

Next Scheduled EDR Contact: 12/26/2011 Data Release Frequency: Quarterly

#### RAATS: RCRA Administrative Action Tracking System

RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

Date of Government Version: 04/17/1995 Date Data Arrived at EDR: 07/03/1995 Date Made Active in Reports: 08/07/1995

DRYCLEANERS: Drycleaner Facility Listing

A list of drycleaners involved in the Indiana 5-Star Environmental Recognition Program. It is a voluntary program that ranks participating drycleaners on a scale of one to five stars. The program recognizes those drycleaners willing to do more for the environment and worker safety than the rules require. These drycleaners are going above and beyond the rules to protect the environment, their employees and their neighbors and customers.

#### **EDR PROPRIETARY RECORDS**

### **EDR Proprietary Records**

Manufactured Gas Plants: EDR Proprietary Manufactured Gas Plants

The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

#### OTHER DATABASE(S)

Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.

CT MANIFEST: Hazardous Waste Manifest Data

Facility and manifest data. Manifest is a document that lists and tracks hazardous waste from the generator through transporters to a tsd facility.

Oil/Gas Pipelines: This data was obtained by EDR from the USGS in 1994. It is referred to by USGS as GeoData Digital Line Graphs from 1:100,000-Scale Maps. It was extracted from the transportation category including some oil, but primarily gas pipelines.

Electric Power Transmission Line Data

Source: Rextag Strategies Corp. Telephone: (281) 769-2247

U.S. Electric Transmission and Power Plants Systems Digital GIS Data

Sensitive Receptors: There are individuals deemed sensitive receptors due to their fragile immune systems and special sensitivity to environmental discharges. These sensitive receptors typically include the elderly, the sick, and children. While the location of all sensitive receptors cannot be determined, EDR indicates those buildings and facilities - schools, daycares, hospitals, medical centers, and nursing homes - where individuals who are sensitive receptors are likely to be located.

#### AHA Hospitals:

Source: American Hospital Association, Inc.

Telephone: 312-280-5991

The database includes a listing of hospitals based on the American Hospital Association's annual survey of hospitals.

Medical Centers: Provider of Services Listing

Source: Centers for Medicare & Medicaid Services

Telephone: 410-786-3000

A listing of hospitals with Medicare provider number, produced by Centers of Medicare & Medicaid Services,

a federal agency within the U.S. Department of Health and Human Services.

**Nursing Homes** 

Source: National Institutes of Health

Telephone: 301-594-6248

Information on Medicare and Medicaid certified nursing homes in the United States.

Public Schools

Source: National Center for Education Statistics

Telephone: 202-502-7300

The National Center for Education Statistics' primary database on elementary

and secondary public education in the United States. It is a comprehensive, annual, national statistical database of all public elementary and secondary schools and school districts, which contains data that are comparable across all states.

Private Schools

Source: National Center for Education Statistics

Telephone: 202-502-7300

The National Center for Education Statistics' primary database on private school locations in the United States.

Daycare Centers: Child Care Listing

Source: Family & Social Services Administration

Telephone: 317-232-4740

Flood Zone Data: This data, available in select counties across the country, was obtained by EDR in 2003 & 2011 from the Federal Emergency Management Agency (FEMA). Data depicts 100-year and 500-year flood zones as defined by FEMA.

NWI: National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002 and 2005 from the U.S. Fish and Wildlife Service.

Scanned Digital USGS 7.5' Topographic Map (DRG)

Source: United States Geologic Survey

A digital raster graphic (DRG) is a scanned image of a U.S. Geological Survey topographic map. The map images are made by scanning published paper maps on high-resolution scanners. The raster image is georeferenced and fit to the Universal Transverse Mercator (UTM) projection.

EDR's GeoCheck Physical Setting Source Addendum is provided to assist the environmental professional in forming an opinion about the impact of potential contaminant migration.

Assessment of the impact of contaminant migration generally has two principle investigative components:

- 1. Groundwater flow direction, and
- 2. Groundwater flow velocity.

Groundwater flow direction may be impacted by surface topography, hydrology, hydrogeology, characteristics of the soil, and nearby wells. Groundwater flow velocity is generally impacted by the nature of the geologic strata.

### **GROUNDWATER FLOW DIRECTION INFORMATION**

Groundwater flow direction for a particular site is best determined by a qualified environmental professional using site-specific well data. If such data is not reasonably ascertainable, it may be necessary to rely on other sources of information, such as surface topographic information, hydrologic information, hydrogeologic data collected on nearby properties, and regional groundwater flow information (from deep aquifers).

#### **TOPOGRAPHIC INFORMATION**

Surface topography may be indicative of the direction of surficial groundwater flow. This information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

#### TARGET PROPERTY TOPOGRAPHY

General Topographic Gradient: General SSW

#### SURROUNDING TOPOGRAPHY: ELEVATION PROFILES

Source: Topography has been determined from the USGS 7.5' Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified.

#### HYDROLOGIC INFORMATION

Surface water can act as a hydrologic barrier to groundwater flow. Such hydrologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Refer to the Physical Setting Source Map following this summary for hydrologic information (major waterways and bodies of water).

**FEMA FLOOD ZONE** 

FEMA Flood

CLAY, IN Not Available

Flood Plain Panel at Target Property: Not Reported

Additional Panels in search area: Not Reported

NATIONAL WETLAND INVENTORY

NWI Quad at Target Property Data Coverage

BRAZIL WEST YES - refer to the Overview Map and Detail Map

#### **HYDROGEOLOGIC INFORMATION**

Hydrogeologic information obtained by installation of wells on a specific site can often be an indicator of groundwater flow direction in the immediate area. Such hydrogeologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

### **AQUIFLOW**®

Search Radius: 1.000 Mile.

EDR has developed the AQUIFLOW Information System to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted by environmental professionals to regulatory authorities at select sites and has extracted the date of the report, groundwater flow direction as determined hydrogeologically, and the depth to water table.

LOCATION GENERAL DIRECTION

MAP ID FROM TP GROUNDWATER FLOW

Not Reported

### **GROUNDWATER FLOW VELOCITY INFORMATION**

Groundwater flow velocity information for a particular site is best determined by a qualified environmental professional using site specific geologic and soil strata data. If such data are not reasonably ascertainable, it may be necessary to rely on other sources of information, including geologic age identification, rock stratigraphic unit and soil characteristics data collected on nearby properties and regional soil information. In general, contaminant plumes move more quickly through sandy-gravelly types of soils than silty-clayey types of soils.

### GEOLOGIC INFORMATION IN GENERAL AREA OF TARGET PROPERTY

Geologic information can be used by the environmental professional in forming an opinion about the relative speed at which contaminant migration may be occurring.

#### **ROCK STRATIGRAPHIC UNIT**

### DOMINANT SOIL COMPOSITION IN GENERAL AREA OF TARGET PROPERTY

The U.S. Department of Agriculture's (USDA) Soil Conservation Service (SCS) leads the National Cooperative Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. The following information is based on Soil Conservation Service SSURGO data.

Soil Map ID: 1

Soil Component Name: Muren

Soil Surface Texture: silt loam

Hydrologic Group: Class B - Moderate infiltration rates. Deep and moderately deep,

moderately well and well drained soils with moderately coarse

textures.

Soil Drainage Class: Moderately well drained

Hydric Status: Not hydric

Corrosion Potential - Uncoated Steel: High

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 46 inches

Soil Layer Information							
Layer	Boundary			Classification		Saturated hydraulic	
	Upper	Lower	Soil Texture Class	AASHTO Group	Unified Soil	conductivity micro m/sec	
1	0 inches	9 inches	silt loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Silty Soils.	FINE-GRAINED SOILS, Silts and Clays (liquid limit less than 50%), silt.	Max: 14.11 Min: 4.23	Max: 6.5 Min: 5.6
2	9 inches	53 inches	silty clay loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Silty Soils.	FINE-GRAINED SOILS, Silts and Clays (liquid limit less than 50%), silt.	Max: 14.11 Min: 4.23	Max: 6.5 Min: 5.6
3	53 inches	59 inches	silt loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Silty Soils.	FINE-GRAINED SOILS, Silts and Clays (liquid limit less than 50%), silt.	Max: 14.11 Min: 4.23	Max: 6.5 Min: 5.6

Soil Map ID: 2

Soil Component Name: Pike

Soil Surface Texture: silt loam

Class B - Moderate infiltration rates. Deep and moderately deep, moderately well and well drained soils with moderately coarse Hydrologic Group:

textures.

Soil Drainage Class: Well drained

Hydric Status: Not hydric

Corrosion Potential - Uncoated Steel: Low

Depth to Bedrock Min: > 0 inches Depth to Watertable Min: > 0 inches

Soil Layer Information							
	Boundary			Classification		Saturated hydraulic	
Layer	Upper	Lower	Soil Texture Class	AASHTO Group	Unified Soil	conductivity micro m/sec	Soil Reaction (pH)
1	0 inches	9 inches	silt loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Silty Soils.	COARSE-GRAINED SOILS, Sands, Sands with fines, Silty Sand.	Max: 42.34 Min: 4.23	Max: 6 Min: 4.5
2	9 inches	50 inches	silty clay loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Silty Soils.	COARSE-GRAINED SOILS, Sands, Sands with fines, Silty Sand.	Max: 42.34 Min: 4.23	Max: 6 Min: 4.5
3	50 inches	64 inches	loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Silty Soils.	COARSE-GRAINED SOILS, Sands, Sands with fines, Silty Sand.	Max: 42.34 Min: 4.23	Max: 6 Min: 4.5
4	64 inches	70 inches	stratified sand to sandy clay loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Silty Soils.	COARSE-GRAINED SOILS, Sands, Sands with fines, Silty Sand.	Max: 42.34 Min: 4.23	Max: 6 Min: 4.5

Soil Map ID: 3

Soil Component Name: Iva

Soil Surface Texture: silt loam

Hydrologic Group: Class C - Slow infiltration rates. Soils with layers impeding downward

> 38 inches

movement of water, or soils with moderately fine or fine textures.

Soil Drainage Class: Somewhat poorly drained

Hydric Status: Not hydric

Depth to Watertable Min:

Corrosion Potential - Uncoated Steel: High

Depth to Bedrock Min: > 0 inches

### PHYSICAL SETTING SOURCE RECORDS SEARCHED

#### **TOPOGRAPHIC INFORMATION**

USGS 7.5' Digital Elevation Model (DEM)

Source: United States Geologic Survey

EDR acquired the USGS 7.5' Digital Elevation Model in 2002 and updated it in 2006. The 7.5 minute DEM corresponds to the USGS 1:24,000- and 1:25,000-scale topographic quadrangle maps. The DEM provides elevation data with consistent elevation units and projection.

Scanned Digital USGS 7.5' Topographic Map (DRG)

Source: United States Geologic Survey

A digital raster graphic (DRG) is a scanned image of a U.S. Geological Survey topographic map. The map images are made by scanning published paper maps on high-resolution scanners. The raster image is georeferenced and fit to the Universal Transverse Mercator (UTM) projection.

### HYDROLOGIC INFORMATION

Flood Zone Data: This data, available in select counties across the country, was obtained by EDR in 2003 & 2011 from the Federal Emergency Management Agency (FEMA). Data depicts 100-year and 500-year flood zones as defined by FEMA.

NWI: National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002 and 2005 from the U.S. Fish and Wildlife Service.

### HYDROGEOLOGIC INFORMATION

AQUIFLOW<sup>R</sup> Information System

Source: EDR proprietary database of groundwater flow information

EDR has developed the AQUIFLOW Information System (AIS) to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted to regulatory authorities at select sites and has extracted the date of the report, hydrogeologically determined groundwater flow direction and depth to water table information.

### **GEOLOGIC INFORMATION**

STATSGO: State Soil Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Services

The U.S. Department of Agriculture's (USDA) Natural Resources Conservation Service (NRCS) leads the national Conservation Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps.

SSURGO: Soil Survey Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Services (NRCS)

Telephone: 800-672-5559

SSURGO is the most detailed level of mapping done by the Natural Resources Conservation Services, mapping scales generally range from 1:12,000 to 1:63,360. Field mapping methods using national standards are used to construct the soil maps in the Soil Survey Geographic (SSURGO) database. SSURGO digitizing duplicates the original soil survey maps. This level of mapping is designed for use by landowners, townships and county natural resource planning and management.

# PHASE I ENVIRONMENTAL SITE ASSESSMENT Former Coal Yard 116 North Depot Street Brazil. Indiana

RECORD OF COMMUNICATION							
Site Name: Former Coal Yard			Location (city): Brazil, Indiana				
Communications with: Mr.				. Sam E	Emmert		
Of: Owner of the Property							
Location: Brazil, Ind	iana		Phone: 812-448-1481				
Communication via	X	Telepl	none		Letter	X	In Person
Recorded By: Ms. Natalie	Recorded By: Ms. Natalie Mathews			0	f: ATC Assoc	ciates, I	nc.
At: (time): 10:00 am				On (	(date): Novem	ber 18,	2011
Re: Phase I Environmental Site Assessment							

### Summary of Communication:

Mr. Emmert escorted ATC throughout the site and provided information as needed. Pertinent information included the following:

- The only historical use of the Property that Mr. Emmert was aware of was as a coal storage yard. He said that all of the previous owners he is aware of were all in the same family.
- Mr. Emmert was aware of two aboveground storage tanks (ASTs) containing gasoline
  that used to be on the Property. Mr. Emmert said the ASTs were on stilts and he is not
  aware of any secondary containments or barriers. He believes the ASTs were used to
  fuel delivery trucks used by the coal yard years ago. The two ASTs were removed from
  the Property in August of 2011.
- He said there used to be two shacks on the Property along with a long, steel building that was used to store coal. He said there was also a scale house/office building along the eastern Property boundary and a weigh station. According to Mr. Ememrt, the scale house/office was the only building on the Property that was connected to any utilities. It was connected to municipal water and sewer. All of the structures were removed in August 2011.
- Mr. Emmert was aware of an issue with coal runoff in the southwest corner of the Property. He said he had put up a plastic barrier to try and prevent runoff from going on the adjoining property.

Conclusions/Required Action/Follow-up: None

#### **WARRANTY DEED**

THIS INDENTURE WITNESSETH, That Barbara C. Pollom, of the County of Clay and State of Indiana, CONVEYS AND WARRANTS to Sam J. Emmert and Joyce E. Emmert, husband and wife, of the County of Clay and State of Indiana, for the sum of One and 00/100 Dollar (\$1.00) and other valuable consideration, the receipt and sufficiency of which is hereby acknowledged, the following described real estate in Clay County, State of Indiana:

A part of the West half of the Southeast quarter of Section 36, Township 13 North, Range 7 West, in the City of Brazil, Clay County, Indiana and more particularly described as follows:

Beginning at a stone North 16 degrees East 12 feet from the Northeast corner of Lot 42, in Hendrix's Fourth Addition to said city and at the East right of way line of the Vandalia Railroad Company, known as the Furnace Switch; thence East parallel with and 12 feet distant from the North line of Lots 39-42, in Hendrix's Fourth Addition 296 feet, more or less, to the West line of Depot Street in said city; thence in a Northerly direction along and with the West line of said Depot Street a distance of 428 feet, more or less, to the South line of a tract of land deeded on September 12, 1914 by James H. McClelland and Julia F. Collins, which deed was recorded on July 8, 1915 in Deed Record 104, page 353 in the Office of the Clay County Recorder; thence Westerly along and with the South line of the said Collins tract 225 feet, more or less, to the East right of way line of the Vandalia Railroad Company Furnace Switch; thence Southerly along and with the said right of way line 449 feet, more or less, to the place of beginning, containing 2.75 acres, more or less.

EXCEPT: A part of the West half of the Southeast quarter of Section 36, Township 13 North, Range 7 West, in the City of Brazil, Clay County, Indiana and more particularly described as follows:

Beginning at a point 331.5 feet Northerly along the right of way line of the P.C.C. and St. Louis Railroad Company, from a stone which is 12 feet North of the Northeast corner of Lot 42 in Hendrix's Fourth Addition to said city on the East right of way line of the Furnace Switch of the P.C.C. and St. Louis Railroad Company (formerly Vandalia Railroad Company); thence Easterly 225.5 feet, more or less, to the West line of Depot Street; thence Northerly along the West line of Depot Street 146 feet, more or less, to the South line of a tract of land conveyed on September 12, 1914 by James H. McClelland and Julia F. Collins to Nicholas Schrepferman, by deed

#### PHASE I ENVIRONMENTAL SITE ASSESSMENT Former Coal Yard 116 North Depot Street Brazil, Indiana

APPENDIX G

**RESUMES** 

#### **EDUCATION**

■ B.A. Environmental Geoscience, DePauw University, Greencastle, IN, 2011

# PROFESSIONAL SUMMARY

Ms. Mathews is a field scientist for the ATC Indianapolis, Indiana office. She is responsible for conducting Phase I ESAs. She has experience in subsurface and hydrologic investigations, logging of geologic boreholes utilizing USCS soil classifications, installation of groundwater monitoring wells, groundwater and soil sampling, and assisting with the preparation of quarterly monitoring reports.

# PROFESSIONAL EXPERIENCE

- Phase I Environmental Assessments / Various Clients / Indiana. Performed Phase I Environmental Site Assessments per ASTM guidelines and lender requirements. Phase I experience includes investigations of active and vacant commercial businesses, multi-family residential and industrial properties.
- Phase II Investigations / Confidential Clients / Indiana. Assisted in Phase II subsurface investigations of brownfields.
- Groundwater Monitoring / Various Clients / Indiana. Performed groundwater sampling at various gas stations throughout Indiana.

# TRAINING AND CERTIFICATIONS

■ HAZWOPER 40-hour training course, 2011

#### **EDUCATION**

B.S., Natural Resources and Environmental Science Purdue University, West Lafayette, 1998

# PROFESSIONAL REGISTRATION

Certified Hazardous Materials Manager, CHMM No. 14627

# PROFESSIONAL SUMMARY

Mr. Cheney is the Due Diligence Manager for the ATC office in Indianapolis, Indiana and has been with ATC since January of 2001. He is responsible for management and coordination of due diligence projects (Phase I Environmental Site Assessments, Transaction Screens, etc.) on a local and national level. Mr. Cheney's ability to manage multi-site portfolios on both a local and national level allows for signification time and cost savings to the client as well as providing a consistent product. Mr. Cheney is typically involved in management and performance of hundreds of Phase I Environmental Site Assessments per year.

Mr. Cheney is also responsible for performing Phase II Subsurface Investigations, asbestos sampling, proposal preparation, and new hire training. Mr. Cheney also has experience with construction quality assurance of sanitary landfill sites, underground storage tank closure projects, groundwater sampling and underground storage tank compliance audits.

# PROFESSIONAL EXPERIENCE

#### Environmental

- Phase I and Phase II Environmental Assessments / Indiana Finance Authority / Indiana. Performed and managed Phase I and Phase II ESAs of Brownfield Sites throughout the State of Indiana for the Trails and Parks Initiative (TPI) that is funded by the EPA Community Wide Brownfield Assessment Grant and Authority funding through 2010.
- Phase I and Phase II Environmental Assessments / Indiana 15 Regional Planning Commission / Indiana. Performed and managed Phase I ESAs of Brownfield Sites located in a six county area in southern Indiana. Fourteen Phase I ESAs were completed within a 4 month period between June and October 2009.
- Phase I Environmental Assessments Brownfields Sites/ Various Clients / Indiana. Performed and/or managed multiple Phase I Environmental Site Assessments per ASTM guidelines and client requirements. Sites consisted of

former industrial facilities, salvage yards, mills, etc. in various locations throughout Indiana.

- Phase I Environmental Assessments / Various Clients / Indiana. Performed and/or managed well over 1,000 Phase I Environmental Site Assessments per ASTM guidelines and lender requirements. Phase I experience includes investigations of commercial businesses, office parks, agricultural land, truck terminals, industrial properties, and stone quarries.
- Phase II Investigations / Various Clients / Indiana. Performed subsurface investigations of multiple commercial properties.
- Underground Storage Tank Removal / Confidential Client / Indiana.
   Assisted in the removal of an underground storage tanks and contaminated soils at a former commercial shopping center.
- PCB Investigation / Confidential Client / Indiana. Performed sampling of a stream and associated sediment to assess impact from stream water on the site used for site operations.
- Asbestos Investigation / Confidential Client / Indiana. Performed multiple limited asbestos surveys at commercial properties.
- Geophysical Survey / Confidential Clients / Indiana. Assisted in geophysical surveys of commercial businesses, state maintenance garages, former landfills and undeveloped lots using an EM-61 electromagnetic metal detection system and ground penetrating radar.

#### Landfill

- Landfill / Waste Management / Jay County, Indiana. Provided construction
  Quality Assurance for installation of geosynthetic liner for a 174,240 square
  footage sanitary landfill cell at Jay County Landfill.
- Slurry Wall CQA / Allied Waste / Dixon, Illinois. Provided Construction Quality Assurance and on-site engineering for a 2000ft Slurry Wall around a closed landfill.
- Landfill CQA / Allied Waste / Illinois. Provided Construction Quality Assurance, on-site engineering and survey control for clay and geosynthetic liner and leachate collection systems for three 8 acre sanitary landfill cells at the Lee County Landfill and an 8 acre sanitary landfill and approximately 1000ft of Sidewall Liner at the Streator Area Landfill No. 3.

# TRAINING AND CERTIFICATIONS

- HAZWOPER 8-hour refresher course, 2010
- OSHA 10-hour Construction Training, 2007
- HAZWOPER 40-hour training course, 1997
- Licensed Asbestos Inspector (AHERA), 2010
- Nuclear Gauge Radiation Safety Certification, 1994

# PROFESSIONAL ACTIVITIES

- Board Member Indiana Association of Hazardous Materials Professionals
- Member of Theta Tau National Professional Engineering Fraternity
